🔗 LinkedIn Profile | 📍 Pasay, Manila

Professional Summary

Detail-oriented Software Quality Assurance Specialist with strong expertise in manual testing and a solid foundation in automation concepts. Experienced in hybrid Agile methodologies (incremental development with continuous testing and client-driven approvals), managing the entire QA process from requirements review and design validation to module-level testing, full system QA, UAT support, and go-live readiness.

Skilled in identifying defects, ensuring usability, and validating functionality across multiple platforms. Proficient in leveraging AI tools to streamline testing, accelerate defect detection, and enhance reporting. Known for collaborating effectively with cross-functional teams and clients, supporting User Acceptance Testing, and ensuring on-time delivery of high-quality software.

Technical Skills

- **Testing Tools:** JMeter, OWASP ZAP, Lighthouse, Katalon Studio, SEO Site Checkup, Page Speed

- **Bug Tracking & Collaboration:** JIRA, GitHub, Hybrid Agile Methodologies (Incremental Development, Continuous Testing, Client-Driven Approvals)
